Automatic soap dispenser 1100ml ABS white

Ref. GW04 14 01 00

DESCRIPTION

Automatic soap dispenser 1100ml ABS white - Ref.GW04 14 01 00

The dispenser made entirely of white ABS material, receives inside a polyethylene tank, with a liquid soap filling capacity of 1,100 ml.
The inner tank fills up opening the casing by means of a safety lock (or by means of a button that is included in the accessories of the product for its replacement) located on the top of the product.
The dispenser includes an infrared sensor on the bottom that activates the automatic mechanism and dispenses 1.5ml of soap per use.
For another use the user must remove the hands and put them back. The dispenser works
using 4 "C" type batteries (not included) with an estimated duration of 60,000 cycles or 1 year (depending on the quality of the batteries); or optionally via AC power supply.
The dimensions of the dispenser are
280x145x140 mm. The installation is carried out attached to the wall using 4 screws with a universal wall plug from the brick factory. Supports vegetable or synthetic soap
