Folding seat nylon, stainless steel wall support

Ref. GW11 38 09 00

Nylon

DESCRIPTION

Folding seat nylon, stainless steel wall support - Ref.GW11 38 09 00

Technical specifications:
Folding Nylon Shower Seat.
The product consists of a supporting structure and a seat assembly.
The structure of support, made entirely of stainless steel tube AISI 304 of 25 mm diameter and 3 thickness covered
by a 5 mm nylon layer (total diameter 35 mm), is formed by a curve U-shaped anchored to the wall by two supports of a Stainless steel AISI 304 in which is located an axis that allows the dejection of the tubular structure with the seat incorporated.
The seated surface, made by four slats of nylon thermoplastic material, is inserted into the stainless steel tube of the structure.
The assembled assembly has adequate
resistance against corrosion and its materials ensure its good maintenance and cleanliness.
The seat is fixed by means of 8 screws and 8 nylon-to-wall dowels supporting in these conditions a static force and maximum dynamic of 120 kg

ADVANTAGES

TECHNICAL CHARACTERISTICS

Folding seat nylon, stainless steel wall support - Ref.GW11 38 09 00

Height	450
Length	315
Finish	Nylon
Depth	380
Thickness	3mm
Diameter	35mm
