Tilting mirror with white painted aluminium frame

Ref. GW11 66 02 00

White epoxy

DESCRIPTION

Tilting mirror with white painted aluminium frame - Ref.GW11 66 02 00

Mirror with aluminum frame.
The product consists of a main aluminum body which is designed to incorporate a mirror inside.
The mirror, manufactured in sheet glass with a total thickness of 4mm, has an anti-fog
factory coated protection on its opaque side.
The aluminum structure has in its back side a profile that crosses horizontally the mirror and itÕs used to fix the mirror to the wall together with two screws.
The structure has a white finishing with galvanized treatment which assures an optimal resistance to daily use.
The total measures of the mirror are 500x600 mm.

ADVANTAGES

Easy to clean: removable bucket
